

CXE860 UNIVERSAL FIBRE OPTIC NODE

The CXE860 is an universal fibre deep optical node. It is designed for cases where high performance and cost effectiveness are a demand.

Features

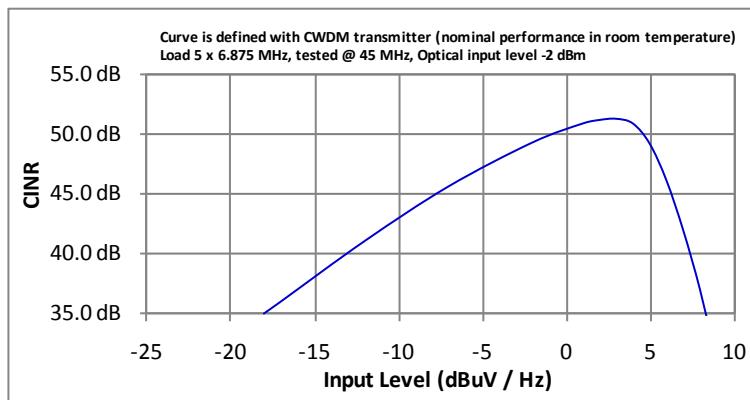

- 2 output level modes with different slopes
- 1006 MHz downstream
- 65 MHz upstream
- OLC
- Wide range of upstream laser wavelengths available
- Low noise current density
- GaAs MESFET output amplifier
- OMI test point
- Optical level measurement

Technical specifications

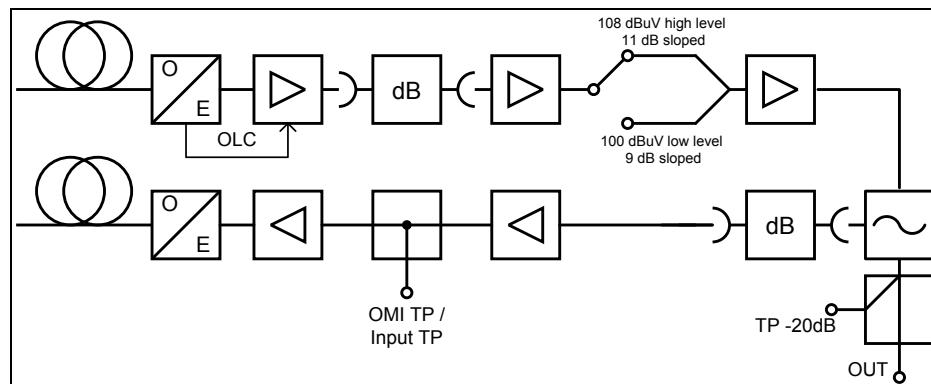

| Parameter | Specification | Note |
|---|-------------------------------|------|
| Downstream signal path | | |
| Light wavelength | 1290...1600 nm | |
| Optical input power range | -8...-2 dBm | 1) |
| Frequency range | 85...1006 MHz | |
| Return loss | 18 dB | 2) |
| OLC limited output level (low/high level) | 100 / 108 dBμV | 3) |
| Level adjustment | 0...-20 dB | 4) |
| Interstage slope (low/high level) | 9 / 11 dB | |
| Flatness | ± 0.6 dB | 5) |
| Test point | -20 dB | 6) |
| Noise current density | 6 pA / √ Hz | 7) |
| CTB 41 channels (low/high level) | 100 / 108 dBμV | 8) |
| CSO 41 channels (low/high level) | 100 / 108 dBμV | 8) |
| XMOD 41 channels (low/high level) | 97 / 105 dBμV | 8) |
| Upstream signal path | | |
| Frequency range | 5...65 MHz | |
| Return loss | 18 dB | |
| Input level | 60.0 dBμV | 9) |
| Input level control | 0...-20 dB | 4) |
| CINR | > 49 dB | 10) |
| Optical output power | + 3 dBm | 11) |
| OMI / Input test point | -10 dB | |
| General | | |
| Power consumption (low/high level) | 9.5 / 11 W | |
| Supply voltages | 165...255 VAC / 26...65 VAC | 12) |
| Optical connectors | SC/APC | |
| Output connector | Can be selected | |
| OMI test point connector | F- female | |
| Dimensions | 182 (210) x 140 (148) x 84 mm | |
| Weight | 1.6 kg | |
| Enclosure classification | IP43 | |
| Operating temperature range | -40...+55 °C | |
| EMC compatibility | IEC 60728 -2 | |
| Safety | IEC 60728 -11 | |
| ESD | 4 kV | |
| Surge | 4 kV, IEC 60728-3 | |

Notes

- 1) OLC is operational within this input power range.
- 2) The limiting curve is defined at 40 MHz -1.5 dB / octave.
- 3) This is the maximum output level with OLC when OMI is 4.0 %. The level is available with the optical input power of -8...-2 dBm. The used wavelength is 1310 nm.
- 4) JDA series attenuators are used.
- 5) Typical value.
- 6) TP is from a directional coupler and has a ± 1.0 dB tolerance.
- 7) Typical value when the optical input power is -8 dBm. This equals CNR of 45.0 dB (OMI 4%)
- 8) IEC60728-3. Optical input power is -4 dBm and OMI is 4.0 %. Nominal slopes are used. All results are typical values in room temperature, which can be used in system calculations. XMOD is measured at the lowest channel.
- 9) 4 % OMI can be reached with this input level if the input attenuator is having 0 dB value. 10% OMI needs 68 dB μ V.
- 10)

- 11) Output power for FP laser is +1 dBm. CWDM lasers are using +3 dBm.
- 12) There is no remote powering possibility through output RF ports.
